Multistix 10 SG Reagent Strips

A single urine strip can provide a wealth of information. Whether testing in an office, clinic, or hospital, Siemens Healtineers reagents can help detect a wide range of conditions, including urinary tract infections, diabetes, and early kidney disease.

When paired with our industry-leading CLINITEK family of analyzers, Siemens Healthineers enhances testing accuracy and workforce productivity by automating your testing environment, eliminating subjectivity of visual read tests and reducing transcription errors.
